

### CYPSY19 Poster Presenter Instructions

On behalf of the Interactive Media Institute, the Virtual Reality Medical Institute, and the International Association of CyberPsychology, Training, & Rehabilitation (iACToR), we want to thank you for joining us at the 19<sup>th</sup> Annual CyberPsychology, CyberTherapy & Social Networking Conference (CYPSY19) in Washington, D.C.. Partnering with presenters like you allows us to further strengthen and advance efforts to improve health care through technology.

As a poster presenter, please note the following:

1. The Poster Session is scheduled to take place on Wednesday, June 18<sup>th</sup> from 17:30 to 19:30. PLEASE ARRIVE AT THE REGISTRATION DESK at 17:00 for setup and instructions on where to place your poster.
2. Your poster must have a vertical or “portrait” orientation. The vertical axis can be a maximum of 40 inches (102 cm). The horizontal axis can be a maximum of 30 inches (76 cm). Multiple presenters share the same display board. Stay within these dimensions so others have room for their posters.
3. Part of what makes poster sessions so informative is the interaction between the poster presenters and the attendees. Therefore, we want to encourage you to be near your poster during the duration of the poster session. Registrants and attendees may want to ask questions and make comments about your poster.
4. Clean-up and completion of the poster session will begin immediately at 19:30. Please be prepared to remove your poster from the room at this time. Posters left unattended during clean-up will be thrown away.

Thank you again for your presentation.

Sincerely,

Brenda K. Wiederhold, Ph.D., MBA, BCIA
